

## Manual for the setup Signal Plus Platinum service.

Welcome to the Signal Plus Platinum service! Follow the steps below to connect and set up your account. Our service BOT will invite you to the Telegram channel and chat.

### **Step one:**

It's important that your Bitmex wallet is not used for trading by other channels or yourself. The wallet needs to have at least 1BTC on it. Please set up a separate Bitmex account for platinum signals.

### **Step two:**

Connect a separate Bitmex account. It is not allowed to trade with this account yourself. If you do trade by yourself, we will stop sending the signals.

### **Step three:**

Make sure the Auto Trader is connected and set up correctly to the Platinum channel and the override is disabled.

### ***You are now ready!***

Review of the results is done in the first week of the new month, and the results are live viewable in your account and on the live results page.

A minimum of 1BTC needs to be in your account and the maximum is 10BTC. You will have access to the platinum-plus channel where you can see the Signals. Please note that we won't discuss them at all. (So, don't send me or Erik questions about the signals) At the end of the month we will share the results, that is the time that I will evaluate them with the Platinum members. Keep in mind that the numbers per month can vary. The service is for a whole year and not for just one month, Trading is not a short-term thing, look at our results from last year and see that the results vary per month.

If you have any questions or need information, please contact @verifiedcrypto

We will provide you with the best service and results.
